Sunmotor specializes in solar powered systems for remote locations. We provide solar pumping systems for villages and farm applications. We also offer custom-designed solar generators to operate electric loads at sites not serviced by utility power.

Sunmotor's vision for the DE industry in Canada sees the solar sector of the industry providing good jobs for skilled technicians to design and install well-designed solar power systems for a wide range of applications in remote locations.

We would like to connect with:

- Looking for merger with larger company to permit bidding on overseas projects.

We can offer you:

- Excellent technical knowledge of solar design + local market for solar products in oil and gas industry.

Our commitment to the growth and development of the DE industry:

- Sunmotor helped to develop the market for solar power at remote locations in western Canada by demonstrating the benefits and reliability of our products.

From a financial investment perspective, our business offers:

- Profitable,

- Excellent client base, and
- Industry leader in our field.

We are working to overcome the following industry challenges:

- Working capital to bid on larger projects,
- Training for technical staff,
- Company succession.
